

EXERCICE 1 Donner le quotient sous forme de fraction :

EXERCICE 2 Placer le point M qui vérifie la condition :

EXERCICE 3 Donner le quotient sous forme de fraction :

EXERCICE 4 Placer le point M qui vérifie la condition :

EXERCICE 5

Construire dans chaque cas les deux points C_1 et C_2 de la droite (AB) qui conviennent (les deux droites graduées sont parallèles) :

a. $\frac{CA}{CB} = \frac{1}{4}$

b. $\frac{CA}{CB} = \frac{2}{5}$

c. $\frac{CA}{CB} = \frac{2}{1}$

d. $\frac{CA}{CB} = \frac{2}{3}$

e. $\frac{CA}{CB} = \frac{2}{7}$
